Design Development & Visualization

2026-2027

ABOUT THE ARTIST

NA'DEJ BAILEY (2003) is an American visual artist with 10 years of digital art, videography, and animation experience. She graduated from Chattahoochee Technical College in December 2025 with an AAS degree in Interior Design, now collaborating with senior designers to develop and visualize interior design concepts through 3D models and her various methods of communicating design intent.

Her objective is to help designers and clients bring their vision to life, transforming ideas from imagination into something they can see, experience, and connect with. Through thoughtfully crafted 3D spaces, she creates a clearer picture of the finished space and makes the journey from concept to reality feel tangible.

SKETCHUP MODEL

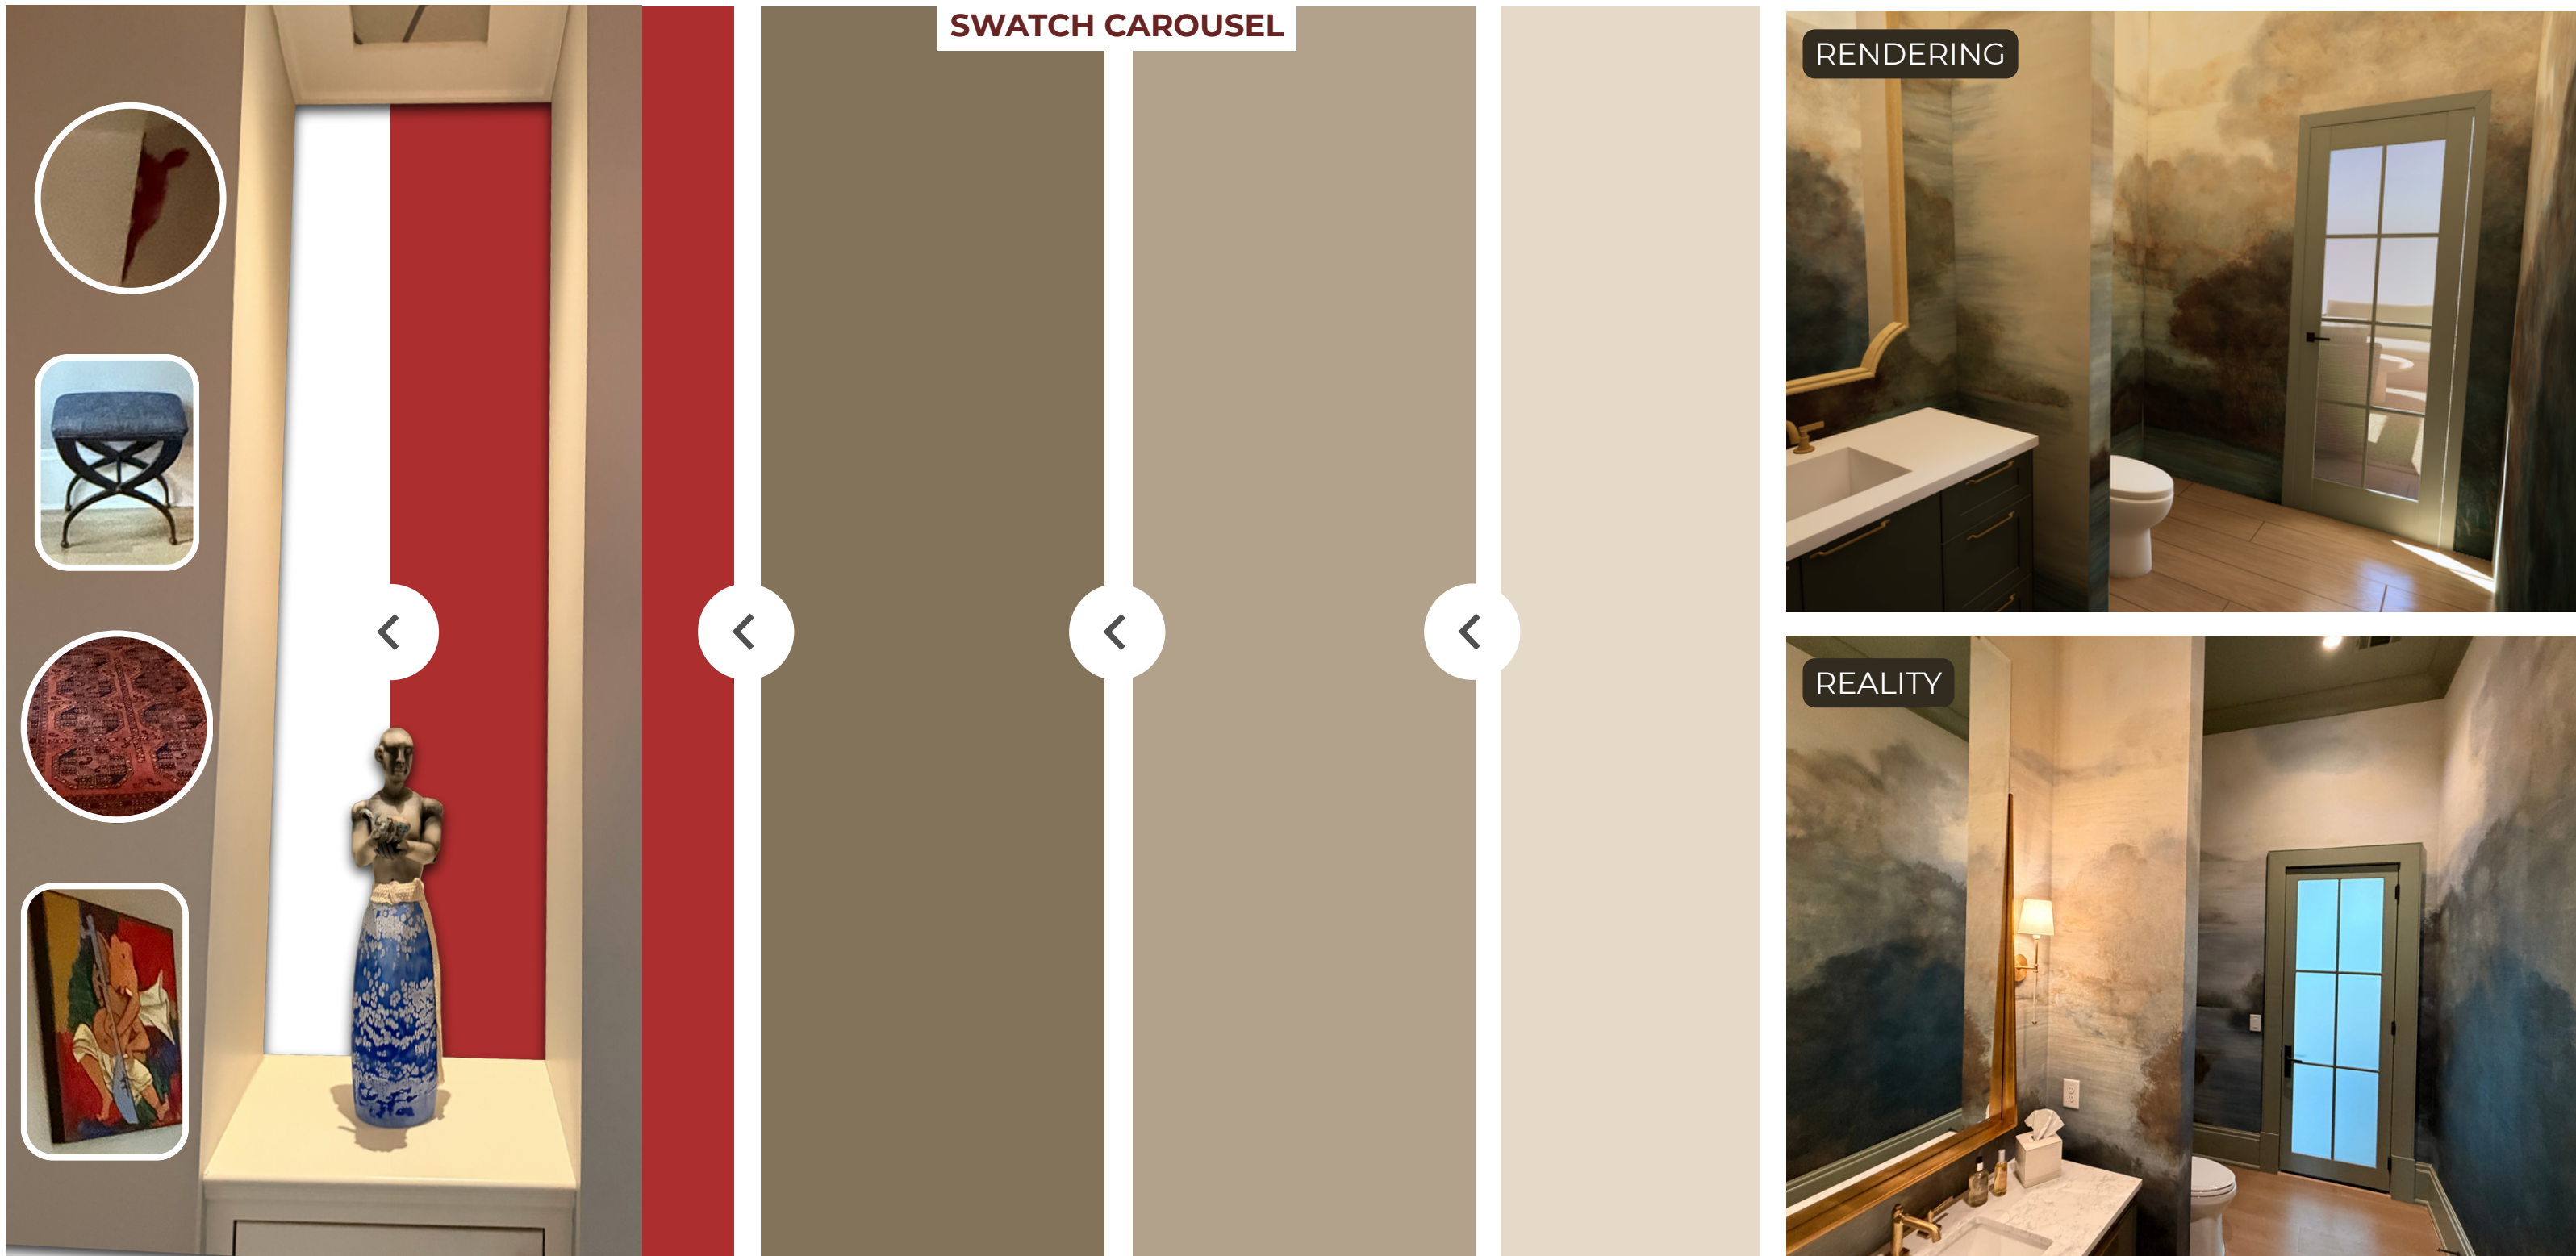

Isometric overview illustrating spatial layout, proportions, and overall composition. Detailed 3D renderings highlight materials, lighting, and atmosphere. Cinematic-quality walkthroughs provide an immersive experience of the complete design.

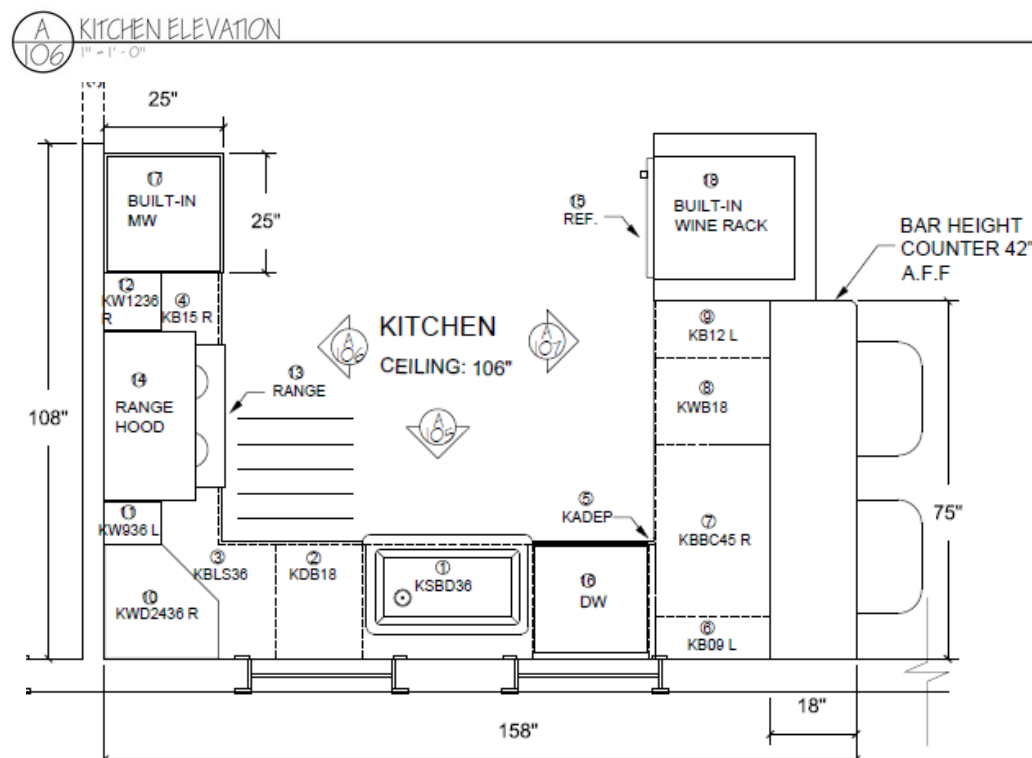

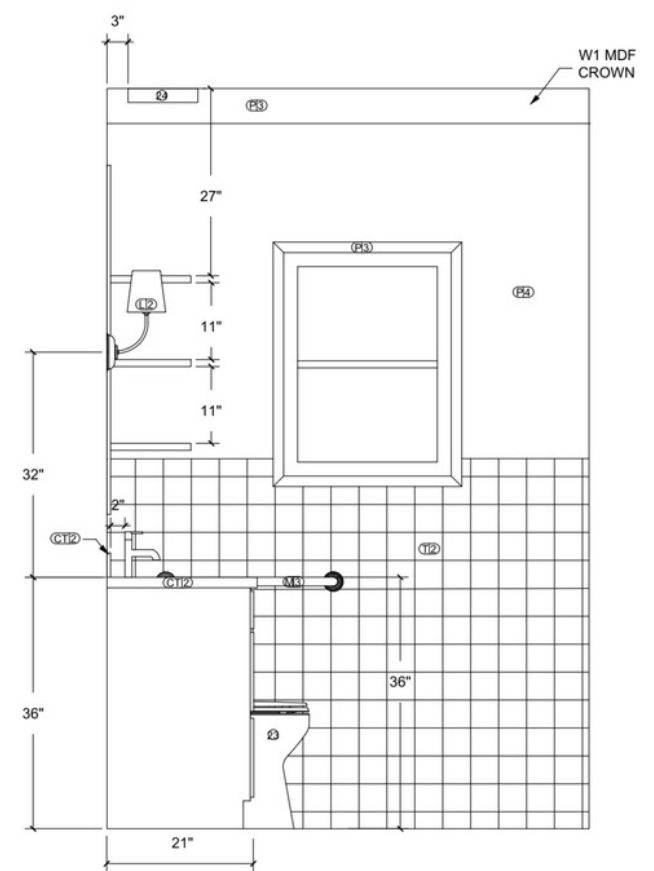

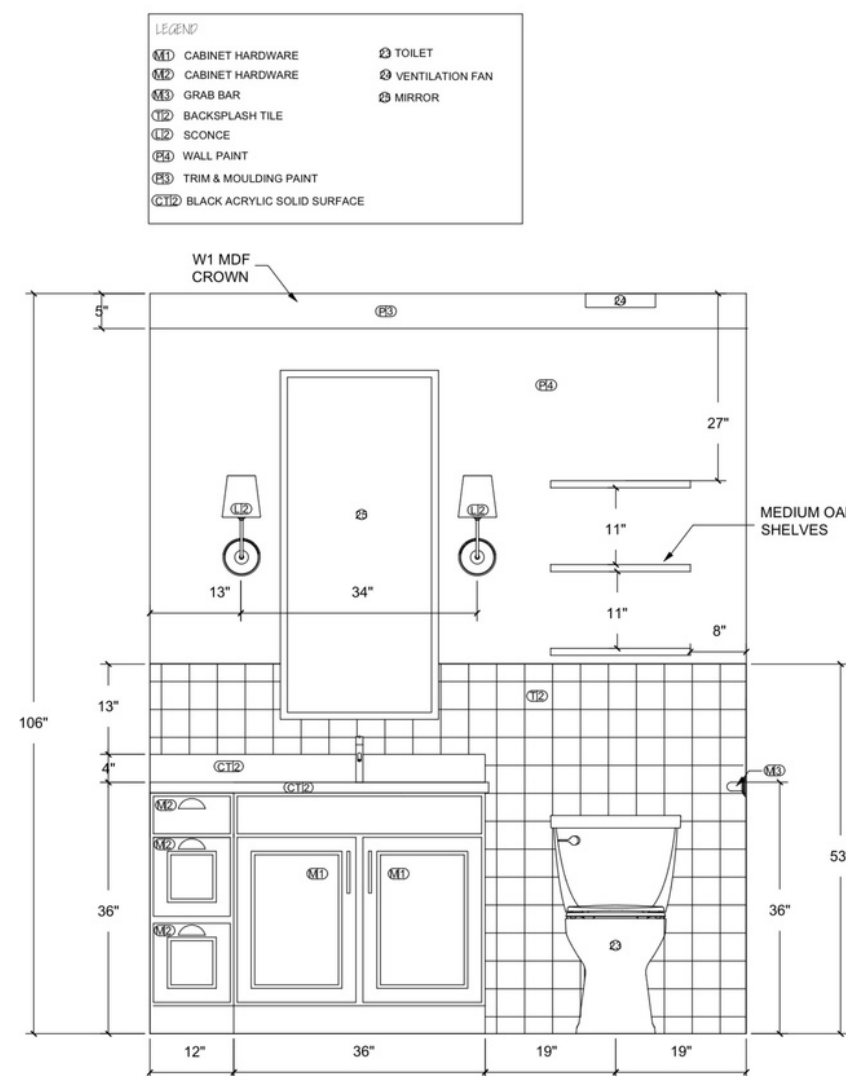

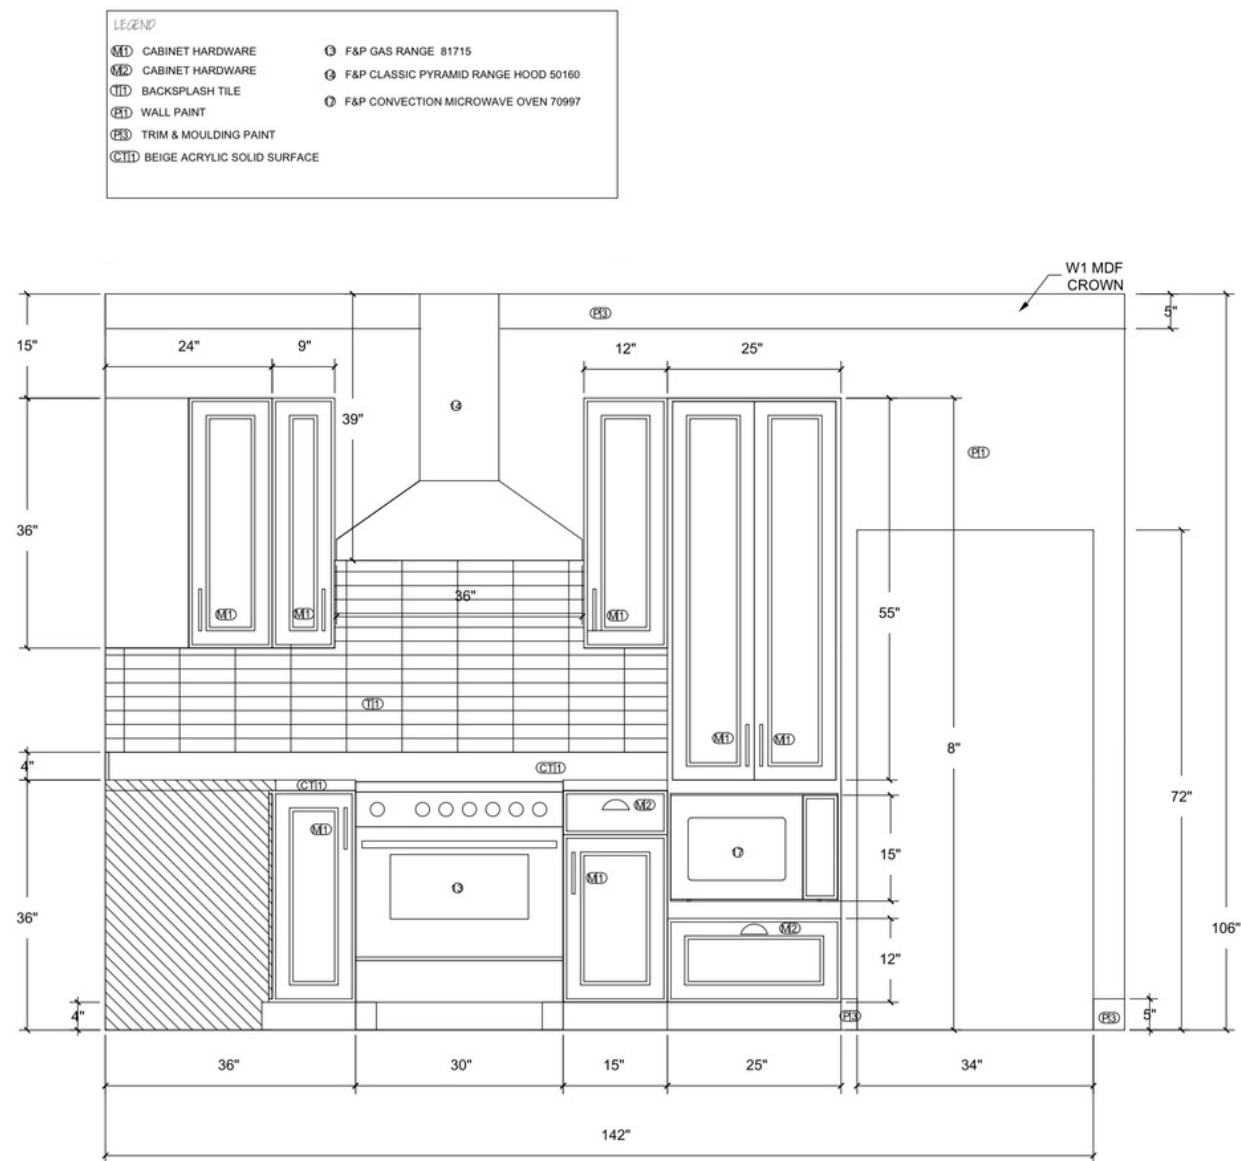

TWINMOTION RENDERING

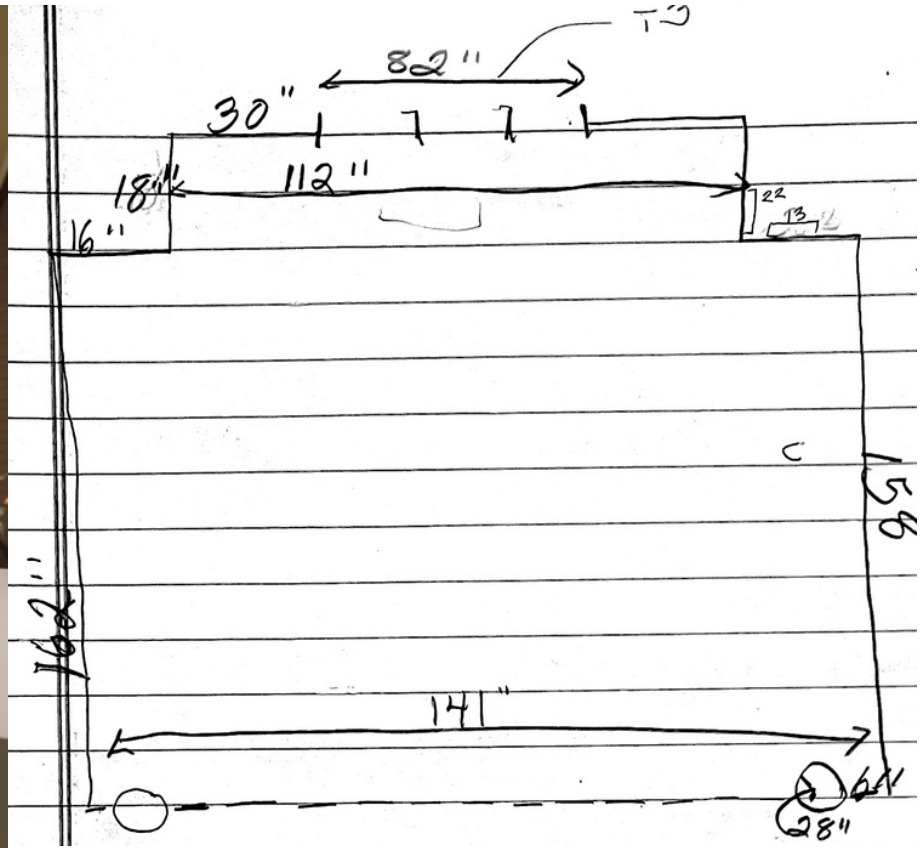

Wallpaper & paint selections demonstrated through interactive 3D models and swatch carousels. Assisted in narrowing down choices. Gathered impressions from the room, which stirred confidence in suggesting the use of a striking red hue. The red swatch was presented in addition to the interior designer's choice of neutral swatches. The energizing red color received the client's approval and was the final choice for the project.

RENDERING

REALITY

3D model construction has been completed from the referencing of photos and a field measurement sketch drawn by the designer of this project. Contributed a design board to the presentation while 3D modeling work was in progress.

REALITY

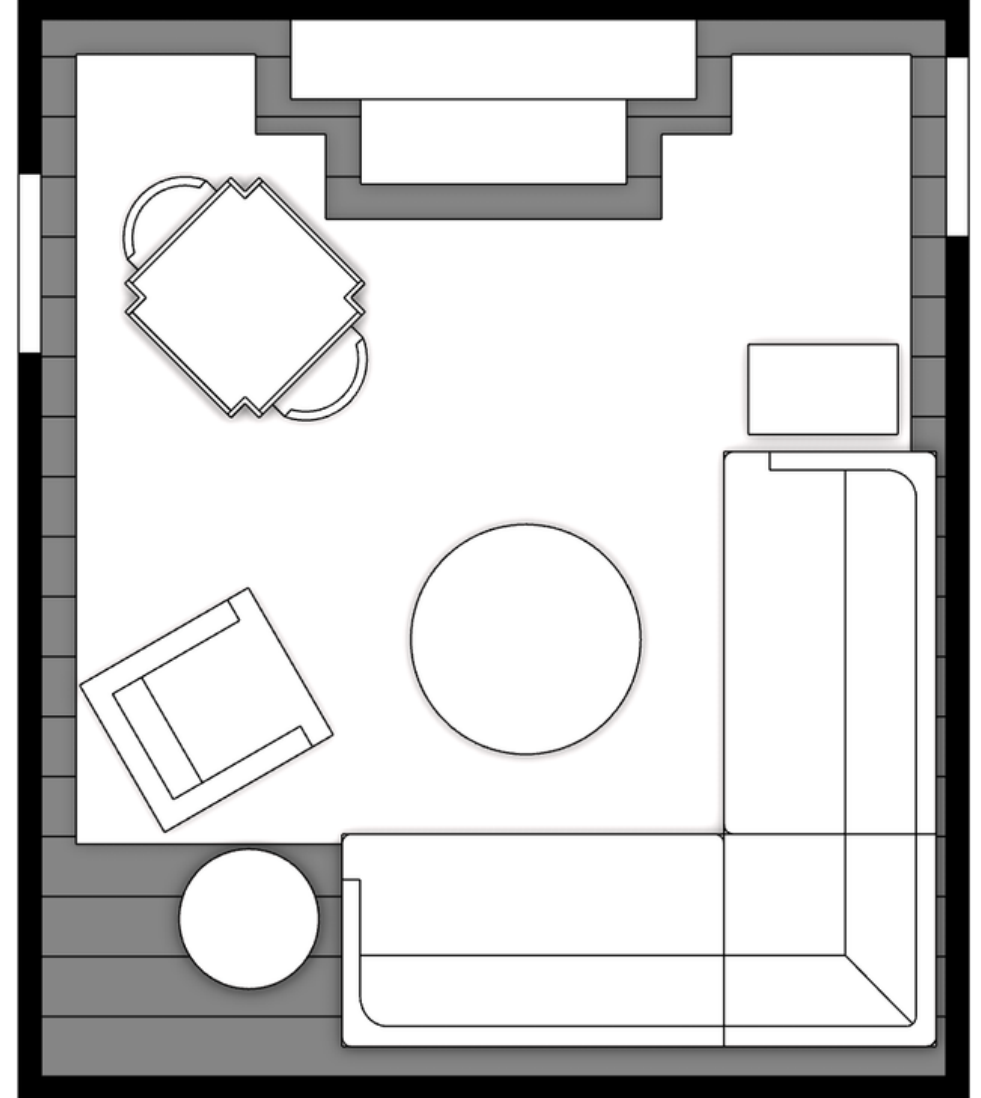

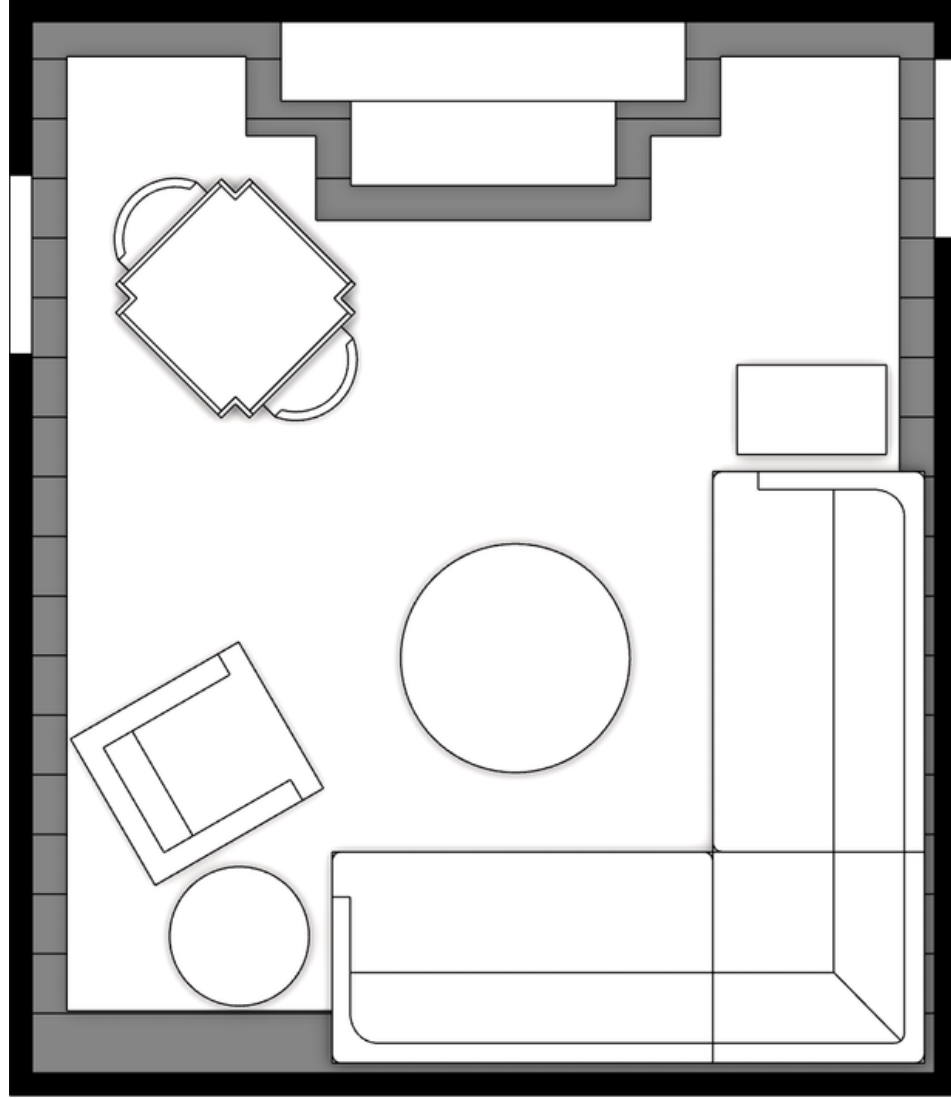

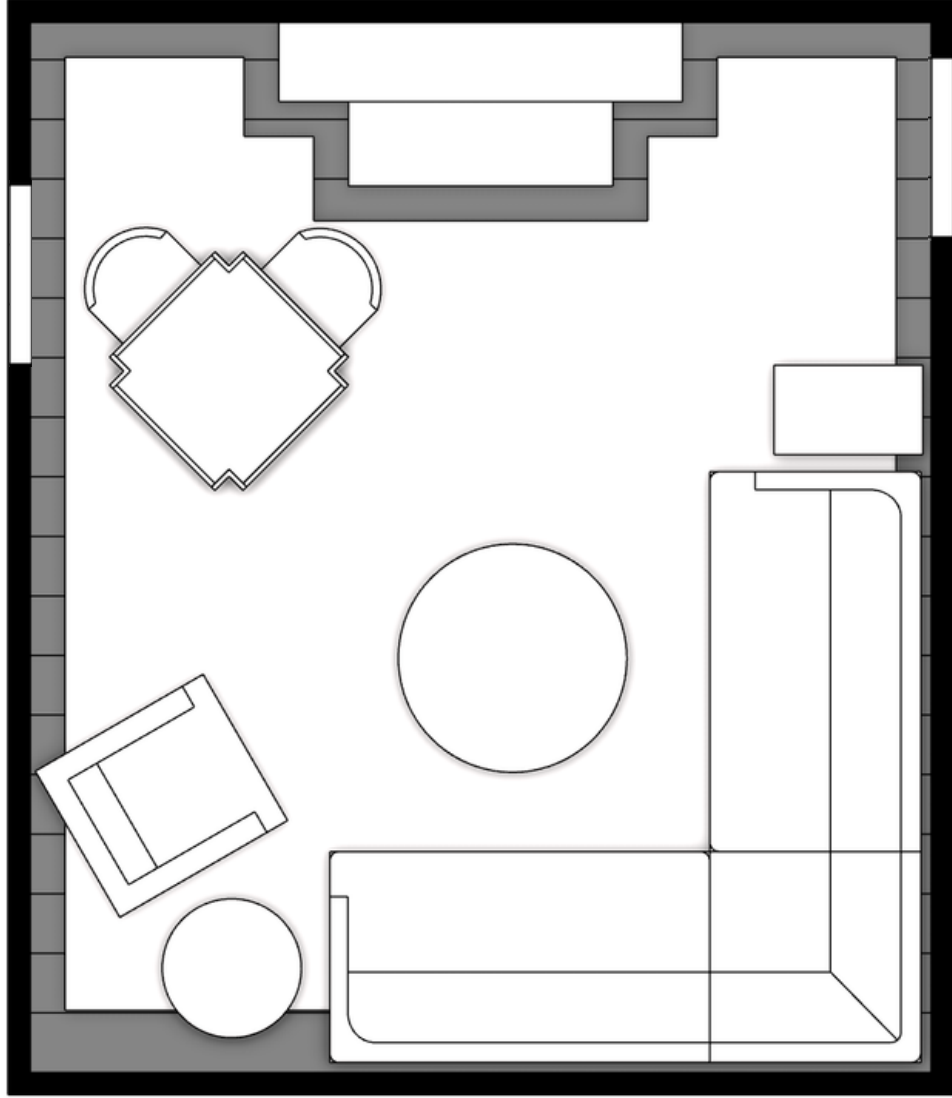

Custom window treatment applied in 3D modeled space.

Room is measured and recreated to show application of custom drapes and Roman shades. Demonstrates choice of fabric, hardware finish, and placement.

RENDERING

Space plan drawings are drafted according to designer's instructions.
Drawn to explore possibilities of furniture placement and spatial relationships.
